Summary

Product Designer with 3+ years shaping consumer products at scale across The Times of India Digital (8.1M DAU) and regional-language OTT streaming (STAGE). Research-led and experiment-driven: drove paywall conversion from 8.01% to 10.50% through iterative A/B testing and grew content starts 30% with a culturally rooted tagging system. Owns work end-to-end and guided 2 design interns at STAGE.

Experience

Times Internet Noida, India
Product Designer *Sep 2025 – Present*

- **Live Blog**: Redesigned and shipped TOI's Live Blog (averages ∼200K views per story) from a read-and-leave feed into an interactive experience, adding engagement touchpoints that build reader intent and return visits.
- **Young Leaders**: Built the content schema, page templates and design-system components powering TOI's kids masterclass series (4 shipped to date; the series has driven ∼$240K / Rs 2 Cr), so new masterclasses ship faster and design time goes to UX.
- **TOI Select**: Led art direction for an immersive, visual-storytelling format for high-impact articles and built the production HTML independently, shipping with no engineering support.
- **Community & Rewards**: Designing topic-based reader communities (bringing user-generated content to a news platform) and a badge-based rewards system built on reader profiles; both in active development.

STAGE (Regional OTT) Noida, India
Product Designer *Oct 2023 – Sep 2025*

- **Paywall & Trial Conversion**: Proposed and led the paywall, motivator and payment-failure flow for a 1 "try now, pay later" trial. Ran 8 hypothesis-driven A/B rounds (∼2K–10K users/variant); scaling the winner lifted conversion from 8.01% to 10.50%.
- **Content Categorisation (case study)**: Replaced rigid genres with multi-dimensional tags (mood, theme, language, format) and combinable filters, designed for regional-language and first-time-internet users; content starts grew 30% after launch.
- **Home Page Platter (case study)**: Initiated and designed a 2–3s motion preview for the home hero that plays when users pause; in a 7-day A/B test (∼12K users), preview engagement rose from 12% to 32%, preview-to-tap from 22% to 60%, and bounce fell from 38% to 23%.
- Guided 2 design interns through their research and design work.

Product Design Intern, STAGE *Jan 2023 – Apr 2023*

- Ran qualitative and quantitative research; supported wireframing, prototyping and usability testing.

Skills

Design: Interaction design, user experience (UX), user flows, wireframing, prototyping, visual/UI design, design systems
Research: User research, A/B testing, card sorting, user interviews, usability testing, competitive analysis
Accessibility: Inclusive design for low-literacy & regional-language users, legible-contrast UI, captioned video
Tools: Figma (incl. Figma AI agent), Adobe Creative Suite
AI: Claude and ChatGPT for research, prototyping, production HTML and UX copy

Education

National Institute of Fashion Technology (NIFT) 2019 – 2023
Bachelor of Design (B.Des.), Accessory Design
